WASHING MACHINE SPECIAL ALL SIZES TO COVER ALL NEEDS

No matter how many people you're washing for, Schneider has a range of washing machines to suit all needs. Our washing machines come with **capacities of 7, 8, 10 and 12 kg** and a **wide choice of programmes and features** to help take a load off your mind.

Measuring just **42 cm deep**, the **SLIM 7 kg** washing machine can fit comfortably into any little niche, including under shelves in the bathroom. Its 10 programmes include a **quick wash**, which is perfect for people in a hurry, and a **delicates wash**, for fabrics that need that bit of extra care. The delay start timer lets you set the washing machine to start while you're out, so you can come home to fresh laundry or save money by starting it during off-peak hours (if your electricity company offers this).

The 8, 10 and 12 kg washing machines all have an **energy rating of A** (with the new rating scale), making them some of the most **high-performance machines on the market**. These machines come with 15 programmes, including a **steam feature**, which eradicates 99.99% of bacteria and eliminates odours as part of the **anti-allergy and baby clothes cycles**. Their inverter motor maintains **excellent performance over time** and **runs more quietly than a traditional motor**. The highest-capacity washing machines let you **wash very large loads in one go**, saving you precious time in your busy schedule.
