A cheeky, iconic collection

Let your cheeky side shine with our collection that pays tribute to Keith Haring through a range of large and small appliances emblazoned with the artist's emblematic designs. Bursting with street art heritage, this collection carefully combines the curved lines of our vintage appliances with Keith Haring's characteristic pop designs and figures. The end result is appliances that are no longer just essential everyday items, but also true works of art that turn your kitchen into a bold, fun, and lively space.
